

Waste Management

Future and current issues for discussion:

- Landfill capacity, estimated years left, MOE regulation, MOE closure planning requirements and estimated costs
- Landfill regulation, extension and potential re-siting vs transfer station
- Recycling and free store location options other than at the fire hall
- Recycling Facility with adequate covered area, storage, sorting and baling room, power and water
- Current MMBC statistics
- Added recycling opportunities beyond MMBC program

Call out for Island representation to form a waste management committee to assist the PRRD in addressing the issues, siting potential new locations etc.

Emergency Services Ongoing Planning for Future New Fire Hall / Renovated Fire Hall

Discussions including local Fire Chief and Emergency Services Manager on how to best facilitate the Lasqueti Island Volunteer Emergency Services personnel, apparatus and training requirements.

Lasqueti Fire & First Responder Dispatch - What is the Concern?

- **Obsolescence of the current mobility pagers**
- **Speed of emergency dispatch**
- **Lack of resiliency of the current Lasqueti fire dispatch system**
- **Costs**
- **Requirement for LVFD to achieve recognized standards**
- **Interest from Lasqueti public in being able to call fire department from something other than landline phones (ie VOIP, text messages)**
- **House numbering for effective emergency dispatch**

These issues are vital for the effective delivery and future sustainability of Fire and First Responder Service on Laqueti, so please come to the Community Hall on Tuesday 23d June at 11 to engage and discuss these issues.
